Address first transaction are Optimism: Gateway, Accepted amount are 0.3eth  
Each address contains Optimism and Arbitrum, We can easily find this pattern  
layer2 has always been the first choice of attackers  
The subsequent operations are generally (note that not all are)

- 1.Optimism: Gateway
- 2.Metamask: Swap Router
- 3.zkSync
- 4.Arbitrum: Inbox

## Group-2

The first transactions are all for zksync, so it is obvious that this is a group of attackers

And the number of account transactions are very small

Details show:
